

**The CDTi has granted HYDRAREDOX IBERIA, S.L. financial support  
under the Neotec Program**

Zaragoza, 21 February 2017

The CDTi has granted HydraRedox Iberia S.L. (HydraRedox) financial support for € 208,250 to carry out its project within the Neotec program.

*The NEOTEC Program aims to support the creation and consolidation of technology-based companies.*

*The most important requirement of the proposals supported by this programme is a business strategy based on the development of a technology (the technology must be the differentiating competitive factor for the company), based on the creation of proprietary R&D&i.*

The tasks to be carried out by HydraRedox within the Neotec program include the optimization and installation of a plant to produce the electrolyte, and the installation and optimization of the assembly plant for the electrochemical cells.

*The Centre for the Development of Industrial Technology (CDTI) is a Public Business Entity, answering to the Ministry of Economy, Industry and Competitiveness, which fosters **the technological development and innovation** of Spanish companies. **It is the entity that channels the funding and support applications for national and international R&D&i projects of Spanish companies.** The CDTI thus seeks to contribute to **improving the technological level** of Spanish companies.*
