

HYDRAREDOX IBERIA sector finalist at the Premios Emprendedor XXI national award

21 March 2018

HydraRedox Iberia, a company from Aragon which manufactures and commercializes medium and large-scale electrical energy storage solutions based on a pioneering and patented Vanadium Redox technology, was a finalist in the Industrial Technologies category of the Emprendedor XXI Awards.

For the national phase, 6 companies were selected in each of the Agri-Food, Life Sciences, Digital Business, Information Technology and Industrial Technologies categories. **In each of the 5 categories, the 3 finalist companies with the highest growth potential were selected.**

The 15 finalists will have access to an **international program of exponential growth** organized with the **Singularity University** and the **ESADE** business school in July in Silicon Valley.

The EmprendedorXXI Awards, promoted by CaixaBank, through the risk capital manager Caixa Capital Risc, and co-awarded by the Ministry of Economy, Industry and Competitiveness, through Enisa, in Spain, and by the BPI bank in Portugal, reach their eleventh edition this year.
