

## **HYDRAREDOX IBERIA PARTICIPATES IN A CONFERENCE ON PROGRESS WITHIN THE FRAMEWORK OF THE EUROPEAN BATTERY ALLIANCE**

HYDRAREDOX IBERIA PARTICIPATES IN A CONFERENCE ORGANIZED BY THE GENERAL SECRETARIAT OF INDUSTRY AND SME OF THE MINISTRY OF INDUSTRY, COMMERCE AND TOURISM

*Madrid, 14 January 2019*

The Spanish Ministry for Industry, Commerce and Tourism, and InnoEnergy – an entity designated by the European Commission to promote partnerships between industry, academia and the financial sector - organized a conference today to present progress within the framework of the European Battery Alliance.

The Alliance was launched in October 2017 by the EC to promote the development of the battery sector in Europe and create synergies between the different stakeholders throughout the value chain, with the aim of positioning the European Union as a worldwide leader in the development and manufacture of energy storage.

The Secretary General of Industry, Raúl Blanco, said “today, the Ministry of Industry, Commerce and Tourism assumes leadership in the development and implementation of these initiatives in our country, which is becoming a key element to boost the future development of European industry, and in particular of those productive subsectors that are facing the challenges arising from the necessary transition towards a low carbon economy”.

The conference was a good opportunity for Spanish companies, including HYDRAREDOX IBERIA, to meet amongst themselves and with European partners in order to form consortia to develop strategic projects.
